The 2002 T-Type Innovation

T-Type 171 / 158 / 145

New generation of Twin-Tip, our T-Type range (171 – 158 – 145) has been elaborated to give full capacity and maximum performance to the most demanded and purist freestyle riders.

Freestyle progresses at high speed. Moves become more radicals. Jumps are even more engaged. Our boards must be a tool to progress, not to hold back.

All parameters have been taken under consideration during our development to give you the widest freedom on the water for your craziest tricks.

The flex, so essential for a good control of the board in choppy waters and over-powered conditions, has been intensely developed. Our computerised conception of the PVC High Density core mixed with our Monocoque Carbon Sandwich technology guarantee the ideal flex on all our T-Type boards.

On our three models, the rails are very thin on the tail section to be closer to the "wakeboard philosophy" and to improve hard rail riding, so important for jumps call or upwind sailing. Our shape is pure. A constant rocker line but slightly raised on both extremities enhances considerably the "pop" to go stronger and higher with a maximum of ease.

The T-Types are real bi-directional boards, developed for big jumps and crazy moves, pushing further the limits of freestyle.

T-Type 171 : equipped with 4 wake fins of 5 cm, it is a board for heavier riders who need a certain volume or for lighter riders, looking for polyvalence and aptitude in light wind conditions (planing with 10 knots).

T-Type 158 : equipped with 4 wake fins of 4 cm, this board is very polyvalent and brought the greatest performance in medium winds.

T-Type 145 : equipped with 4 wake fins of 4 cm, this boards will surprise you by its agility in medium wind conditions and by its control and performance in stronger winds.

Our reactivity allows us to present you today the most modern and high tech Twin Tip of the moment.

To ride AHD, it's to live the tendency ... without waiting ! Take good note of that !

Specifications

	T-Type 145	T-Type 158	T-Type 171
Length / cm	145	158	171
Width / cm	34	37.5	40.9
Scoop/lift / mm	44	52	64
